

Li-ion Power Pack (PP20CC)

Instruction Leaflet - Please keep for future reference

PP20CC supplied complete with:-

- 12v 16amp Li-ion battery
- Canvas belt/shoulder bag
- Cigar or jack socket connections
- Adapter lead
- Ac 100-240 50/60hz - Dc 12.6v 2ah Mains charger.

General Information:

Battery (B26) - The Li-ion battery comes with a (BMS) for protection against overcharging, short circuit, over heating and high current drain.

Charger - CH27 Intelligent 2 amp mains charger with DC plug

Charging: A full charge is recommended before use.

Insert the mains charger into a suitable 100-240v AC mains socket. Then plug the DC plug on the end of the lead into the DC input socket on the battery pack. Now switch the mains power on to charge your pack. The red light on the charger will now be alight and after approximately 10 hours from a fully discharged battery the light on the charger will change to green to indicate a fully charged battery.

Safety Advice and Hints for Best Performance.

Warning:

- (1) Do **NOT** attempt to recharge the battery pack with the lamp still connected.
- (2) Do **NOT** short circuit.
- (3) Do **NOT** disassemble or deform the battery pack
- (4) Do **NOT** Strike, throw or trample the battery pack
- (5) Do **NOT** dispose of in fire or water.

May explode if damaged or disposed of in fire

- (6) Charge every 3 months if not used often to maintain the life and performance of the battery.
- (7) To avoid unnecessary wear or damage to connections and leads disconnect when not in use.
